

I do not want the no call list abolished. If they want to send something in the U.S. Mail, that is ok.  
I feel it is an invasion of my privacy for tele-marketers to call during peak family times or any time. We get very little time to spend as a family unit as it is these days with both parents working. Please don't take what little time we do have together away.  
Prior to the no call list, we would get numerous calls every evening and throughout the day. Not just one call from each company, but sometimes numerous calls about the same thing!  
Do not abolish the no call list.
